

SKIN BEAUTIFUL DERMACEUTICALS

The Science Behind Time Rewind Anti-Wrinkle Serum

Anti-Wrinkle Tests on Healthy Volunteers

Time Rewind Anti-Wrinkle Serum utilizes the latest in anti-wrinkle peptide technology. Clinical tests show there was a reduction of wrinkles by up to 50% within 28 days. Skin topography analysis was performed by obtaining silicon imprints from around the eyes of 10 healthy women volunteers. Silicon imprints were obtained pre-tests and after 28 days of twice a day application of the serum.

Safety and ecology

As these peptides have an effect on neurons, they have been extensively tested for safety aspects. Standard and well-defined safety testing has been performed, which has proved the ingredients to be safe for cosmetic use. The data available does not indicate any environmental risks. The manufacturing process is designed to meet the criteria for the assessment of safety,

health and protection of people and of the environment set out in the Responsible Care Program.
